

บริษัท อาร์ ซี แอล จำกัด (มหาชน) Regional Container Lines Public Company Limited

Press Release for Financial Results as at 30 September 2018

During this current competitive environment, RCL's total liftings for 3Q 2018 fared 4.6% better than that of last quarter's and recorded a 6.9% improvement year-on-year. With the improvement in liftings, freight income was up by 7.7% from 2Q 2018 and was 4.1% higher when compared to its corresponding quarter of the previous year. Total revenue inched up to THB 3,091 million, a 5.2% year-on-year rise, or a 5.7% upswing in comparison with the previous quarter of THB 2,923 million, despite a quarter-to-quarter drop of 26.5% in gain on sale of assets.

In tandem with the increase in volume achieved and the unusually high bunker prices caused by the on-going trade war, uncertainty, and the severe impact of typhoon in China, RCL's total expenses went up by 18% when compared to the same quarter last year. The spike was lesser at 7.3% on a quarter-to-quarter basis. The cost of freight and operations in 3Q 2018 jumped 18.9% higher than the corresponding period of 2017 and hiked up 7.3% compared to its previous quarter. A 51.3% surge in bunker cost for 3Q 2018 vis-à-vis 3Q 2017, was the main contributing factor to the increase in total expenses. On a quarter-to-quarter basis, the bunker cost ascended 11.9%

With escalating bunker cost consequentially impacted RCL's bottom line, it slipped into unfavourable territory posting a net loss of THB 93 million for 3Q 2018 versus a net profit of THB 242 million in 3Q 2017 and recorded a drop of 116.3%, when compared to previous quarter.

INDEPENDENT AUDITOR'S REPORT ON REVIEW OF INTERIM FINANCIAL INFORMATION

To The shareholders and Board of Directors of
Regional Container Lines Public Company Limited

I have reviewed the accompanying consolidated statement of financial position as of September 30, 2018 of Regional Container Lines Public Company Limited and its subsidiaries, the related consolidated statements of income and comprehensive income for the three - month and nine - month periods ended September 30, 2018, the statements of changes in equity and cash flows for the nine - month period ended September 30, 2018, as well as the condensed notes to the consolidated financial statements, and I have also reviewed the separate financial information for the same periods of Regional Container Lines Public Company Limited. Management is responsible for the preparation and presentation of this interim financial information in accordance with Accounting Standard 34 (revised 2017), "Interim Financial Reporting". My responsibility is to express a conclusion on this interim financial information based on my reviews.

Scope of review

I conducted my reviews in accordance with Standard on Review Engagements 2410, "Review of Interim Financial Information Performed by the Independent Auditor of the Entity". A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with auditing standards and consequently does not enable me to obtain assurance that I would become aware of all significant matters that might be identified in an audit. Accordingly, I do not express an audit opinion.

Conclusion

Based on my reviews, nothing has come to my attention that causes me to believe that the accompanying interim financial information is not prepared, in all material respects, in accordance with Accounting Standard 34 (revised 2017), "Interim Financial Reporting".

As at 30 September 2018 and 31 December 2017 the Group has deductible temporary differences, temporary differences arising from exchange difference occurring while translating financial statements in functional currency into presentation currency, the provisions for employee benefits and unused tax losses totaling Baht 324.35 million and Baht 343.69 million, respectively, (the Company Baht 25.76 million and Baht 52.58 million, respectively). However, the Group did not recognize deferred tax assets as the Group believes that it is not probable that future taxable profit will be available to allow the entire deferred tax assets to be utilized including almost income of the Group being exempted from income tax, except a subsidiary in Thailand which recognized deferred tax assets amounted Baht 3.55 million and Baht 0.54 million, respectively.

As at 30 September 2018 and 31 December 2017 the Group has temporary difference arising from exchange difference from the translation of the financial statements from functional currency into presentation currency associated with investments in subsidiaries for which deferred tax liability has not been recognized, aggregating Baht 184.77 million and Baht 194.08 million, respectively.

22. Financial instruments

The Group could be exposed to the market risk, including primarily changes in interest rates and currency exchange rates. The Group uses derivatives and other instruments to manage and hedge such risk but not for speculative or trading purposes.

22.1 Financial risk management

The Group's financial instruments principally comprise cash and cash equivalents, trade receivables, trade payables, and loans. The financial risks associated with these financial instruments and how they are managed is described below.

(1) Credit risk

Credit risk arises from the inability of customers to meet the payment terms in the normal course of business. Credit limits are set for specific amounts and due care is taken in granting credit. Furthermore, it is the Group's policy to evaluate customer's credit worthiness based on its latest financial performance. Therefore, the Group does not anticipate incurring material credit losses from its debt collection.

(2) Interest rate risk

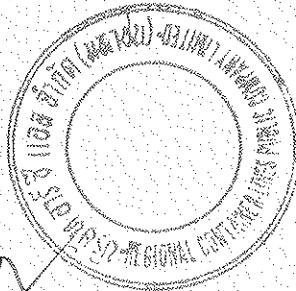

The Group could be exposed to risk in interest rates due primarily to the Group's long - term loan obligations. However, derivative and other financial instrument hedging are used for its long - term loan interest obligations.

The Group's policy is to manage its interest cost using a mix of fixed and variable interest rate debt. To manage this mix in a cost - efficient manner, the Group enters into interest rate swaps in which the Group agrees to exchange at specific intervals, the difference between fixed and variable interest amounts calculated by reference to an agreed - upon notional principal amount. These swaps are designated to hedge underlying debt obligations at the statements of financial position date. The Group does not hold or issue derivative instruments for speculative or trading purposes.

As at 30 September 2018, the Company had a period - by - period knock out swap and interest rate swap agreement covering the notional 2 promise amount of USD 15.97 million (31 December 2017 : 1 promise of amount USD 8.30 million), an interest rate of LIBOR is to be swapped for a fixed interest rate, with the notional amount base used for determination of the interest to be amortized at a rate of USD 1.25 million per quarter, the contracts expiration date is the year 2020 and 2023.

For the three - month period ended 30 September 2018, the Company had unrealized gain from changes in the fair value of derivatives of USD 0.01 million, or approximately Baht 0.43 million (30 September 2017 : USD 0.01 million, or approximately Baht 0.34 million). (3) Foreign currency risk

The Group business spans across the Asian region and, as a result, is exposed to foreign currency exchange rates. For that reason, the freight charges are prices in US dollars and payable in local currency equivalents, a natural foreign currency hedge is created by matching the currency of income flow (linked to US dollars) to the currency of indebtedness. This mechanism functions as a key factor for the Group's ability to manage its foreign exchange exposures. Most of the loans extended to the Group, are thus denominated in currencies similar to that of its income flow. In addition, the Group uses derivative instruments, as and when it considers appropriate, to manage such risks. The Group does not use foreign currency forward contracts or purchased currency options for trading purposes.

In addition to foreign currency transactional exposures, the Group is also exposed to foreign exchange movements on its net investment in foreign subsidiaries. As at 30 September 2018 and 31 December 2017, the Group does not hedge such exposures to foreign movement risk as it is minimal.

Whenever possible, it is the Group's policy to negotiate the terms of the hedged derivatives to match the terms of the hedged financial assets or liabilities item to maximise hedge effectiveness.

(4) Commodity price risk

Bunker cost represents a major component of the operational costs of a subsidiary in Singapore. Hence the said subsidiary is exposed to bunker price fluctuations. As at 30 September 2018, a subsidiary in Singapore has taken protection against the higher price risk with the physical bunker forward purchase contract within the certain limit in accordance with the Group's policy. The physical bunker forward purchase policy which blends interval forward with spot purchase has provide the Group with a less risk exposure to bunker price. And a subsidiary has outstanding commitments under the above purchase contract as described in note 20.1 (b) to the interim financial statements.

22.2 Fair value

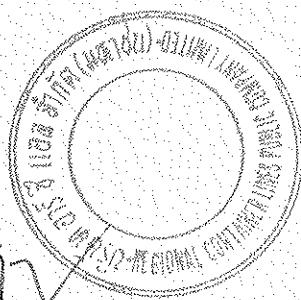

Other than the long - term loans, which carry interest at rates which closely approximate market interest rates, the majority of financial assets and liabilities are short - term, and their carrying values do not materially differ from their fair values.

23. Capital management

The primary objective of the Company's capital management is to ensure that it has an appropriate financial structure and preserves the ability to continue its business as a going concern.

The Company manages its capital position with reference to its debt - to - equity ratio also to comply with a condition in the long - term loan agreements, which require the Company to maintain a consolidated debt - to - equity ratio of not more than 1.5 : 1.

As at 30 September 2018, the Group's debt - to - equity ratio was 1.12 : 1 (31 December 2017 : 0.95 : 1) and the Company's was 0.88 : 1 (31 December 2017 : 0.62 : 1).
